

# DIY Christmas Slime

## Supplies:

- ~ ½ cup of warm water, divided
- 1 TSP of baking soda, divided
- 2 (6oz) bottles of clear Elmer's Glue
- ~ 1 ½ TBSP glitter in red or green or Christmas confetti
- 3 TBSP of contact lens solution, divided **\*\* Make sure the contact lens solution contains boric acid! \*\***

## Directions:

1. Empty one 6oz bottle of glue into a large bowl.
2. Fill the empty glue bottle approximately ⅓ full of warm water.  
(It will be about ¼ cup of water.)
3. Shake the bottle to combine the remaining glue with the water.
4. Pour water into the bowl with the glue, and stir to combine.
5. Add ½ TSP of baking soda to the glue & water, and stir to mix thoroughly.
6. Stir in one color of glitter into the glue mixture.
7. Add 1 ½ TBSP of the contact lens solution to the glue mix, and stir well.
