

DIY Snow Slime

Supplies:

- 1 bottle of white, silver and blue glitter
- 2 bottles of clear Elmer's glue
- 3 small mason jars
- Foil snowflakes
- A bowl
- A spatula
- Liquid starch
- Washi tape

Directions:

1. Start by pouring your glue into your bowl.
2. Add the glitter.
3. Stir.
4. Add the starch. We added 1/4 cup to start with and then after kneading for 3 minutes added another dash.
5. When you knead the slime, forcefully knead it. I stretch and wrap it around into a ball, then knead some more. I like mine really tough and rubbery. If you like more liquidy slime, add less starch.
6. Add in the snowflakes (make sure they don't have sharp sides) and let your helper play for a while so that you can make the lids with washi tape.
7. All ready to give away!
