

Mix n Match Stone Snow Friends

Supplies:

- Stones
- White Paint
- Sharpies (get fun colors to add details to your snow friends)

Directions:

1. To make your snow friend, first you'll need to paint your stones white.
2. They'll need time to dry, so you can do this part one day and leave the decorating to the next day when the paint will be totally dry.
3. Take two or three stones per snow friend – one stone for the head, and one or two for the body.
4. Then just draw features onto each stone with your sharpies, it can be as simple or as detailed as your kids like so this idea will work for any age of child.
5. We added hats, scarves, buttons for the body and little twig arms, along with of course a carrot for the nose.
6. Once you're done, you can mix and match the bodies with each snow friend, or stack them up to build your snow friend upwards too.
