

Snow Launcher

Supplies:

- White cups
- Black and orange craft foam
- Balloons (white or black)
- Scissors
- Glue

Directions:

1. Begin by cutting the bottom off of two white cups.
2. Then, take two white balloons and cut the tops off of those to create a larger opening.
3. This will make it easy to stretch the balloons over the cup bottoms.
4. Layer the bottom rim of each cup with glue. I used a glue stick, but hot glue would work even better.
5. Now, quickly pull the balloons over the glue and press down until secure.
6. Once the balloon pieces were secured I decorated the front of the cups to look like snowmen using craft foam.
7. Give kids cotton balls, white pom poms, or balled up paper to launch at each other, and they are sure to have a blast!
8. All they have to do is place the "snow" inside the cup and gently pull back on the balloon.
